Lecture: Word Embeddings

- Video: Week Introduction 1 min
- Video: Overview 2 min
- **Reading:** Overview
- Video: Basic Word Representations 3 min
- **Reading:** Basic Word Representations 5 min
- Video: Word Embeddings 3 min
- Reading: Word **Embeddings** 4 min
- (Video: How to Create Word Embeddings 3 min
- **Reading:** How to Create Word Embeddings? 4 min
- Video: Word Embedding Methods 3 min
- Reading: Word **Embedding Methods**
- Video: Continuous Bagof-Words Model 4 min
- **Reading:** Continuous Bag of Words Model 3 min
- Video: Cleaning and Tokenization 4 min
- Reading: Cleaning and

Transforming Words into Vectors

To transform the context vectors into one single vector, you can use the following.

As you can see, we started with one-hot vectors for the context words and and we transform them into a single vector by taking an average. As a result you end up having the following vectors that you can use for your training.

Context words	Context words vector	Center word	Center word vector
I am because I	[0.25; 0.25; 0; 0.5; 0]	happy	[0; 0; 1; 0; 0]

Mark as completed
